DETAILED ACTION

This is to acknowledge the receipt of "Amendment after Final" filed on 10/19/2009.

Status of Claims

Claim 23 has been amended, claims 23-30 are pending in application, and claim 23 is the only independent claim. The amendment does not enter the new matter (Refer to the table 2 -1 of the instant specification).

Status of the Previous Rejections

The previous rejection of claims 23-30 under 35 U.S.C. 103 (a) over Hildebrandt et al (US 4,173,501, thereafter, US'501) in view of Maruzen Co.Ltd (NPL: "Heat treatment of steel: basis and operation standard", Iron and Steel Institute of Japan, Maruzen Co.Ltd., Feb. 20, 1978, p.110, Table 2.38 and Table 2.39, Page 257-259, Fig.5.85, thereafter, NPL-1) is withdrawn in view of the "Amendment after final" and remarks filed on 10/19/2009.

Allowable Subject Matter

Claims 23-30 are allowed. The following is a statement of reasons for the indication of allowable subject matter:

US'358 teaches a process for producing a steel constant velocity joint by applying an induction hardening treatment. US'358 teaches providing a hot worked steel with the composition ranges overlap the composition ranges of the instant invention.

Art Unit: 1793

US'358 does not specify the cooling rate at least 0.2°C/s and the structure of bainite and/or martensite with total volume fraction being 10% or more as recited in the instant claim 23. Although US'358 teaches that the induction hardening depth can reach to 4.6 to 5.7 mm and Austenite grain size number not less than 8 (JIS—about 23 μm and US'358 teaches sample having grain size about 18 μm), but US'358 has not provided an enabling disclosure for making a 8 μm or less prior austenite grain size through the thickness of the hardened layer as recited in the instant claim 23. The Examiner notes the unexpected grain size change during induction hardening between the temperature ranges of 800 to 950°C (related to the grain size less than 8 μm --refer to the Fig.2 of the instant specification), which is not taught or suggested by the recorded prior arts.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delay, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on statement of Reason for Allowance".

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jie Yang whose telephone number is 571-2701884. The examiner can normally be reached on IFP.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Roy King can be reached on 571-2721244. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
